PPA Preamble

Welcome to Auction 65.

This auction has been delayed a couple of weeks to enable David to attend the 2006 Swan River Stamp Show. So come and see David if you are attending. He will also have most of the lots for this auction there for viewing as well as many items for direct sale.

Swan River Stamp Show is being held at the Guild Village, University of WA
Hackett Drive Nedlands. The opening times are:
Saturday   21st October   10am to 5pm
Sunday   22nd October   10am to 4pm

This auction has just over 3,300 lots from nearly 250 different countries or states with our usual excellent array of stamps, postal history, postmarks, postal stationery etc from Australia and the world.

Australia and its States/Colonies are well represented and of course there are 100s of lots of Australian postmarks, both numerals and datestamps. We are also pleased to continue to another selection of Victorian registration labels, from one of the finest collections we have ever seen. We have a fine array of Western Australian datestamps including Marindo which has not even been recorded as a TO. We also have another strong selection of Victorian datestamps.

There is another fine array of Picture Postcards and collectors of Australian varieties are also well catered for.

Our world collectors have not been forgotten as we have a wide array of world, stamps, postal stationery and postal history.

 As usual there is always too much on offer to enable us to do more than just highlight a few areas. Hopefully you will find many items of interests in this catalogue.

The best way of bidding is to use our website www.premierpostal.com. However if you don't have access to the internet or you are not comfortable placing bids on our website then, of course, you can still use the printed bidsheet that comes with the catalogue and fax or mail it to us, or you can phone your bids through if you prefer. We will take bids any way they come.

Everyone has worked worked hard to get this catalogue ready in time and, as always, their hard work and enthusiam is very much appreciated

David, Debbie, Lida & Freedom

HOW TO GET THE MOST FROM OUR CATALOGUE
[These notes are offered as a guide to understanding the information given as symbols.]

1. Firstly, we have the lot number. If it is in **bold and <u>underlined</u>**, the item is illustrated: e.g. **<u>1234</u>**. (The actual location of the illustration is given at the end of the description: e.g. {Page 41.37} is position 37 on page 41.)

2. The second column contains a symbol, which represents the item(s) in the lot:

**	Mint, unmounted o.g.	*	Mint, mounted o.g.
Ω	Unused, no gum	Δ	Piece ("Postmarks" lots)
C	Cover or card ("Postmarks" lots)		
A	Albums and accessories	L	Literature
P	Proof		
S	Stamp ("Postmarks" lots)		

or, in the case of used stamps, covers & Postal Stationery a grading of the cancellation:

V	Neat postmark, leaving most of the stamp design clear	F	Neat postmark, across at least half of the stamp design
G	Untidy or indistinct postmark	H	Heavy or poorly struck postmark

3. The third column gives an overall quality assessment for the lot, from 'A' to 'D'. The same standard applies to mint and used stamps, to covers, postal stationery, literature etc. An item graded 'A' is very fine; it has no faults. 'B' items are fine and may have minor imperfections. A 'C' item will exhibit obvious faults. Items in poor condition are rated 'D'. Occasionally, an item in truly superb condition will be rated 'A+'. This grading is used sparingly and is not applied to modern material, which one would normally expect to be in very fine to superb condition. An otherwise very fine item which has a subsidiary problem may be allocated an 'A-'. This may be a stamp with writing or a hinge remainder on the reverse. A cover may have a receiver's endorsement on the face. The halves of a letter card may be stuck together. A book may have a previous owner's notations. Whether this factor makes the item an 'A-' or 'B' is a matter of degree.

4. The fourth column is relevant to perforated stamps, and also to lots listed under the sub-heading 'Postmarks'.
For **perforated stamps**, this column gives a grading for both centring and perforations. The letter 'A' to 'D' relates to centring. 'A' stamps are very well centred; 'B' stamps are slightly off-centre; 'C' stamps are significantly off-centre, and may have the perforations slightly into the design; 'D' stamps are badly off-centre, with the perforations well into the design. [**NB:** These gradings are the same for all perforated issues, whether Australian Decimals, De La Rue Colonial keyplates or 19th Century American issues. However, it should be understood that for many issues poor centring is the norm. Thus 'C', and even 'D', gradings should be expected and accepted. For such issues a 'B' stamp will be above-average and an 'A' stamp will be considered an exceptional copy.]
Following the letter 'A' to 'D' is a number '1' to '4'. A stamp with all perforations intact is '1'. One or two short perfs, or normal rough perforations, will drop the grading to '2'. More notable perforation problems such as the perfs down one side being trimmed will result in a '3' grading. A stamp with major perforation faults will be a '4'. [**NB:** A stamp graded 'A1' is well-centred with all perforations intact. In many cases, particularly with modern issues, this is the norm. However, for many issues, 'B2' or even 'C3' may be normal and quite acceptable.]
For lots listed under the sub-headings **"Postmarks"** and **"Ship/Paquebot Markings"**, this column gives a grading for quality of the strike, and completeness. Quality is graded from 'A' (very fine) to 'D' (poor). Completeness is graded from '1' (complete) to '5' (identifiable only). '+' is used for superb strikes; '-' is used for postmarks which are lightly struck, a little doubled, or otherwise a bit short of the mark.

5. The 5th column contains the general description of the of the lot and should be self-evident, however the following notes apply specifically to postmark description.
Whenever possible postmarks will be described in full, except that the top portion of a postmark is only spelt out when it differs from the post office name or requires some clarification. bracketed shaded text within a description indicates that these characters cannot be read, while greyed characters are hard to read or are only partly present, as is the case when part of the postmark is on the edge of a stamp. Very large or small letters are represented by large and small fonts respectively; small fonts are particularly used to indicate the presence of small nylon wheels in the datestamp. The following example illustrates these points:
'[POST] OFFICE/21DE86/GARAH'.
For postmark lots the condition of the postmark is the most important aspect of our descriptions. Minor defects in the stamp or cover are mentioned only when the value of the item is significant. Naturally, major defects will always be described.

6. The symbols in the second, third and fourth columns, and the illustrations of lots, **form part of the lot description.**

7. Figures in the right-hand column are our **estimate** of value. You may bid at, above or below estimate. The reserve price for almost every lot is 80% of estimate (rounded to the nearest bidding step). Bids below this level will not be considered. Lots with an estimate of $3 or less have no reserve.

8. Australian residents will have GST added to the hammer price of all lots.

9. We use the following standardised abbreviations:

o.g.	original gum	opt(d)	overprint(ed)
d/s	datestamp	cds	circular datestamp
h/s	handstamp	mss	manuscript; handwritten
ERD	earliest recorded date	LRD	latest recorded date
o/o	opened-out	RLabel	registration label
M/S(s)	miniature sheet(s)	PPC	picture postcard
cnr	corner	blk	block
impt	imprint	mtd	mounted
provl	provisional	wmk	watermark
LDL	large dateline (postmarks)	SDL	small dateline (postmarks)
TLC,TRC,LLC,LRC		Top Left Cnr, Top Right Cnr, Lower Left Cnr, Lower Right Cnr
